CFRIX rated 5-stars by Morningstar for the period ending 12/31/2025, based on 10-year risk adjusted returns, out of 173 funds in the Bank Loan category.

FUND OBJECTIVE

The Fund's investment objective is current income.

INVESTMENT STRATEGY

The Fund invests in a portfolio composed mainly of senior secured corporate loans (sometimes referred to as "adjustable rate loans," "floating rate loans," or "bank loans"). These loans hold a senior position in the capital structure and are typically rated below investment grade.

The Fund may invest in other debt securities, including high yield securities (commonly referred to as "junk bonds").

The Sub-Advisor utilizes a disciplined, bottom-up approach that focuses on credit fundamentals, relative value, and active risk management.

The Sub-Advisor seeks opportunities that generate income and have profit potential, while managing default risk.

INVESTMENT PROCESS

- Disciplined bottom-up approach with emphasis on quantitative and qualitative credit analysis.
- Balanced with top-down analysis of macro and industry considerations.
- Investment committee-driven credit underwriting process.
- Add value with thoughtful asset allocation & diversification.
- All investments are analyzed daily and re-underwritten quarterly.
- Pro-actively manage portfolio holdings to quickly identify issues or relative value trades.

CURRENT INCOME: 30-DAY SEC YIELD

Class	Subsidized	Unsubsidized
Class I	6.43%	6.13%
Class A	6.23%	5.95%
Class C	5.42%	5.13%

SEC Yield calculated according to SEC form N-1A. The Advisor and the Fund have entered into an expense limitation agreement. As of December 31, 2025. The 30-Day SEC Yield represents net investment income earned by the Fund over the 30-day period ending 12/31/2025, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period. Subsidized yield refers to the yield with contractual expense reimbursements. Unsubsidized yield is the yield without fee waivers or expense reimbursements.

The Catalyst/CIFC Senior Secured Income Fund offers an investment opportunity for investors seeking high current income from adjustable rate securities.

Primary Goals & Reasons to Invest

High Current Income: The Fund invests primarily in senior secured debt instruments which typically pay a variable rate that adjusts with changes in short term interest rates.

Risk Management: The Fund will seek opportunities that generate income and have profit potential, while managing default risk and duration. Generally, senior floating rate bank loans are secured by a lien on the borrower's assets. These securities are also the most senior level debt in companies' capital structure, giving them payment priority over other loans, bonds or stock.

Focused Portfolio: The Fund uses a disciplined, research-intensive approach to company and security selection. Each investment decision carefully weighs potential risks to capital, while seeking attractive yields.

Quality ratings reflect the credit quality of the underlying securities in the Fund's portfolio and not that of the Fund itself. Quality ratings are subject to change. Moody's assigns a rating of AAA as the highest to C as the lowest credit quality rating.

Glossary:

Alpha: A measure of the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Beta:** A measure of a fund's sensitivity to market movements. **Modified Duration:** provides a measure of a fund's interest-rate sensitivity -- the higher value a fund's duration, the more sensitive the fund is to shifts in interest rates. **R-squared:** A statistical measure that represents the percentage of a fund's movements that can be explained by movements in its benchmark index. **Morningstar LSTA Leveraged Loan Index** is a market-value-weighted index that tracks the performance of the U.S. leveraged loan market. **Bloomberg US Aggregate Bond Index:** A market capitalization-weighted index that is designed to measure the performance of the U.S. investment grade bond market with maturities of more than one year.

Risk Considerations:

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to the activities and financial prospects of an individual security in the Fund's portfolio. Investments in foreign securities could subject the Fund to greater risks, including currency fluctuation, economic conditions, and different governmental and accounting standards. The Fund's portfolio may be focused on a limited number of industries, asset classes, countries, or issuers. The Fund may invest in high yield or junk bonds, which present a greater risk than bonds of higher quality. Other risks include credit risks and interest rate for floating rate loan funds. Changes in short-term market interest rates will directly affect the yield on the shares of a fund whose investments are normally invested in floating rate debt. Floating rate loan funds tend to be illiquid; the Fund might be unable to sell the loan in a timely manner as the secondary market is private, unregulated inter-dealer or inter-bank re-sale market. These factors may affect the value of your investment.

Based on risk-adjusted returns, CFRIX also rated 5-stars by Morningstar for the period ending 12/31/2025 for the Overall and 3-year periods, and 4-stars for the 5-year period, out of 212 funds, 212 funds, and 201 funds respectively, in the Bank Loan category. © 2026 Morningstar. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life sub-accounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year Morningstar Rating metrics (as applicable).
